

## **Nueva Ecija Medical Center, San Leonardo Nueva Ecija:**

*Providing premier medical services to those who need it most*

The Nueva Ecija Medical Center (NEMC) is a state-of-the-art medical facility in San Leonardo, Nueva Ecija. With its advanced diagnostic center and dedicated medical professional on board, NEMC is set to provide the best and most up-to-date healthcare services to San Leonardo and its surrounding communities.

To achieve this, NEMC sought the best equipment to provide a stable and uninterrupted water supply. Outfitting their facilities with the latest high-quality pump equipment from Danish pump manufacturer Grundfos, locally distributed by industry leader Bestank Manufacturing Corporation.

*"We are confident with the specified Grundfos pumps brand, especially coming from an industry leader as Bestank, Nueva Ecija Medics is assured with the best products, the latest water delivery technologies and*

*- Engineer Adonis Agustin / Project Consultant -*

Bestank installed the Grundfos SQ3-45 multi-stage submersible pump for NEMC's deep well source. Its unique hydraulic design ensures high pump efficiency with a low energy footprint. To add even more efficiency, the SQ3-45 was fitted with the Grundfos PM2 Pressure Manager. This engineered system ensured a steady, constant and uninterrupted water supply throughout the facility.

*"A steady and reliable water source is really important for hospitals, especially for a remote location as the Nueva Ecija Medics Hospital. A reliable supply can only be achieved with a reliable system to provide it. Bestank provided that with their industry leading solutions from Grundfos. Now, the Nuevo Ecijanos have emergency and medical services to serve them when they need it."*

*"Many thanks to your kind cooperation and technical support, Bestank! More power!"*

- Engineer Adonis Agustin / Project Consultant -
