

ASSEMBLY INSTRUCTIONS

Check and Prepare all the tools and components of the Sanitank Septic Tank:

Upper Shell

Partitions (x2)

Tools required for assembly

the pre-marked inlet and outlet holes)

Drill and 4 inch Hole Saw (optional, a knife can also be used to cut

Lower Shell

Transfer Pipes (x2)

Cover

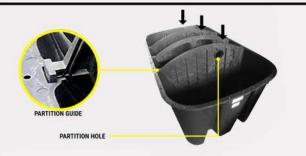

Sealing **Rubber Rings** 1000L = Small x2, Medium x1 1500L = Small x 2, Medium x1 2000L = Small x1, Medium x1, Large x1

Bolts and Nuts

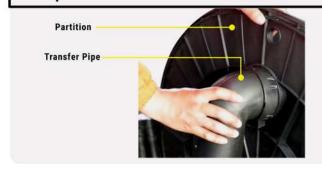

1000L = 48pcs 1500L = 52pcs 2000L = 64pcs

Anti leak sealing tape

Place Partitions in slots provided in the Lower Shell of the Septic Tank, make sure the partition guide (Fig 1) is properly slotted in the groove.

Connect Transfer Pipes in the holes provided in the face of both Partitions

Drill or Cut away the inlet and outlet of the Sanitank and place the Sealing Rubber Rings in each hole.

If INLET side If OUTLET side

Note:

- Find the pre-marked circles as a guide for the inlet and outlet holes, they are located both in the side and the front of the Sanitank Septic tank, choose what best conforms to your desired piping layout
- 2 Note that there are two pre-marked circles, the UPPER circle is for the INLET and the LOWER circle is for the OUTLET.
- 3 INLET must always be drilled (or cut) CLOSE TO THE AIRVENT

Place the provided Sealing Tape on Each side of the lower body.

Align the Upper Shell on top of the Lower Shell, sandwiching the Sealing Tape in between, fasten with provided Bolts and Nuts, tighten

Place provided Covers on top of the Sanitank Septic Tank.
